

På tross av hørselstekniske hjelpemidler kan det være vanskelig å oppfatte tale. Her er noen råd når du snakker til hørselshemmede:

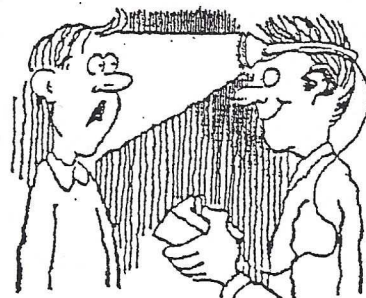

GODE RÅD NÅR DU SNAKKER MED HØRSELHEMMEDE:

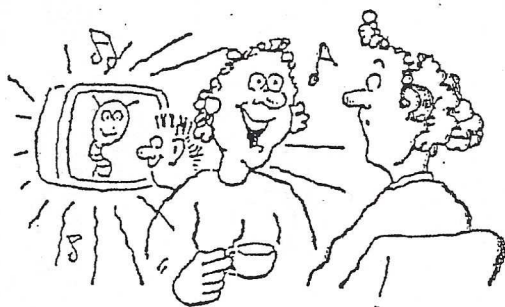

Snakk direkte til den hørselshemmede —
få øyekontakt.

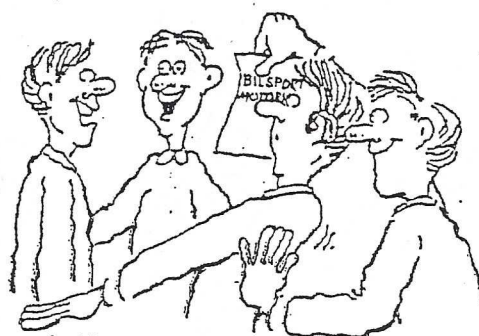

Bruk normal styrke på stemmen. Rop ikke
inn i øret og slett ikke mot høreapparatet.

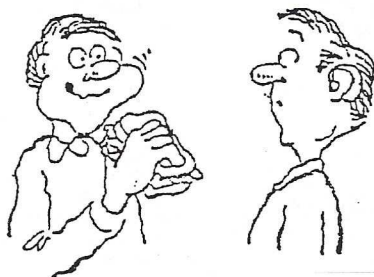

Plasser deg slik at lyset faller på ansiktet ditt
— aldri med ryggen mot et lyst vindu.

Unngå unødvendig støy, f.eks. demp lyden på radio og TV.

Prøv å få den hørselshemmede med i samtale med andre — gi korte
stikkord for samtaleemnet. Bare én skal ha ordet samtidig.

Munnen din skal være godt synlig og
snakk ikke med noe i munnen.

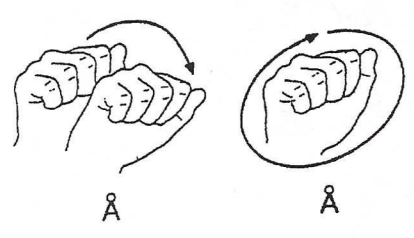

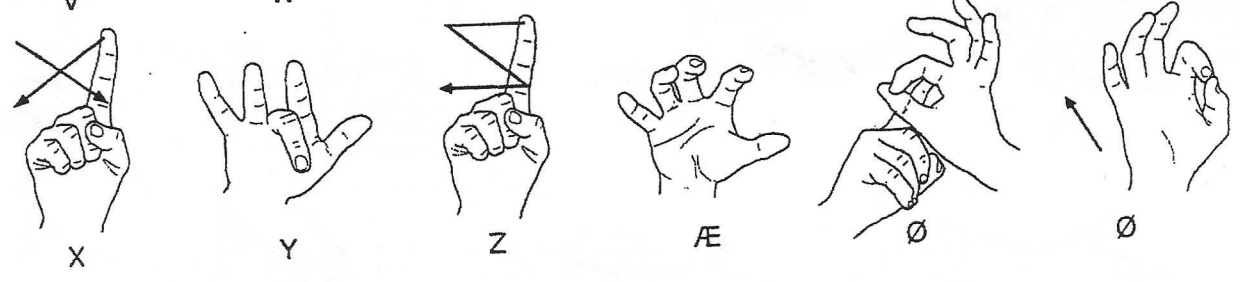

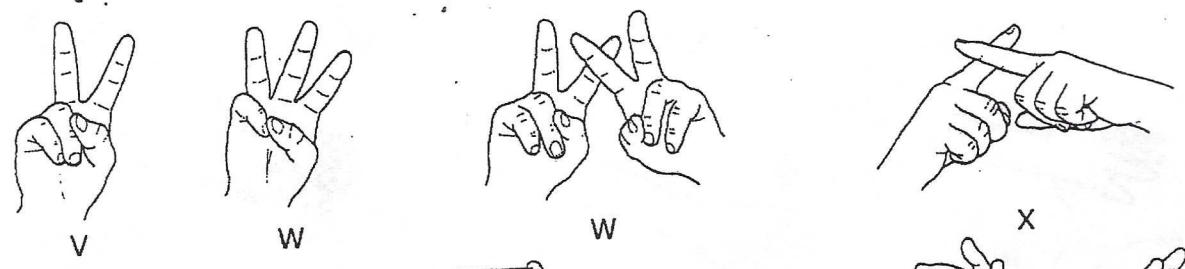

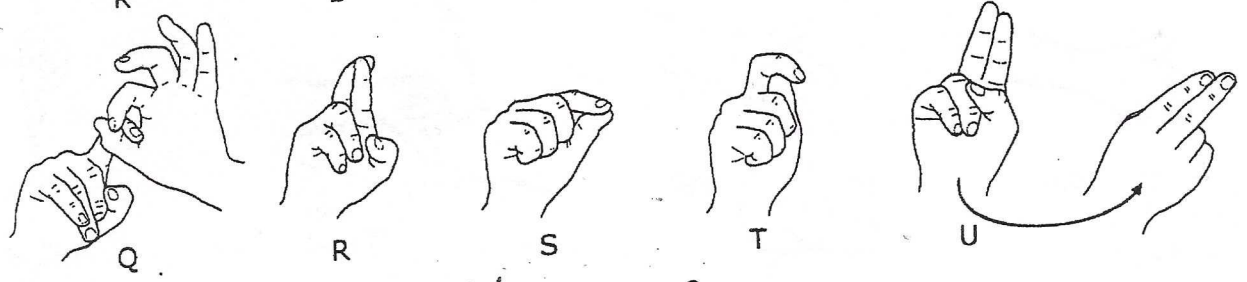

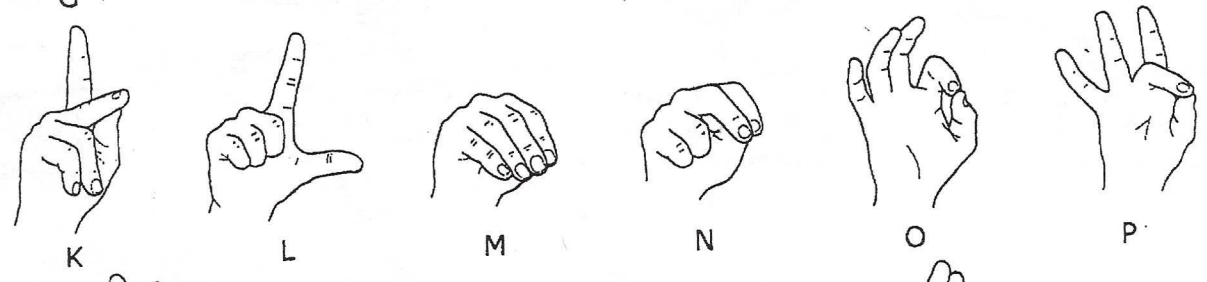

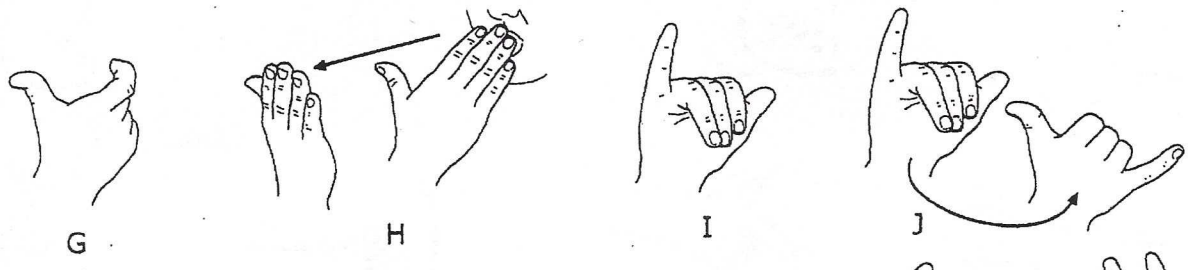

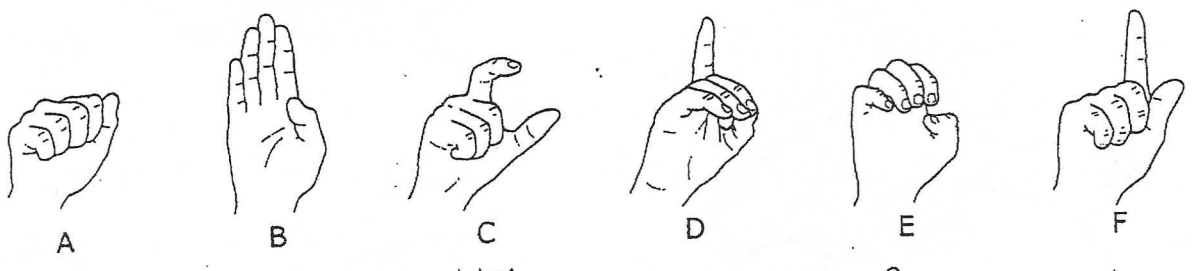

Snakk tydelig og ikke for fort. Gjenta hvis
nødvendig; gjerne med andre ord.

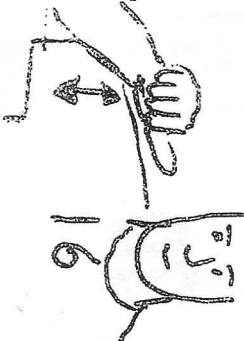

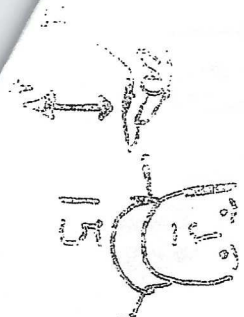

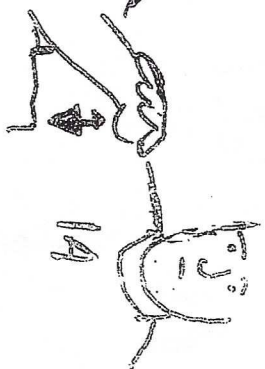

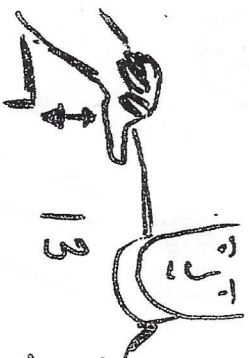

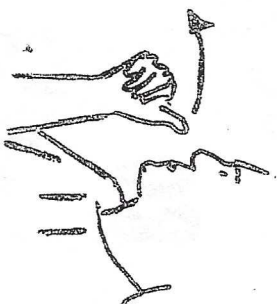

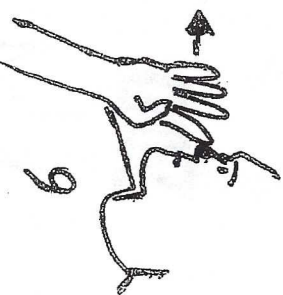

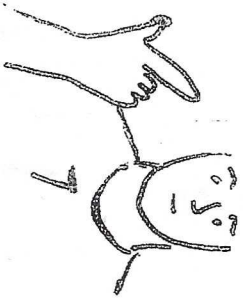

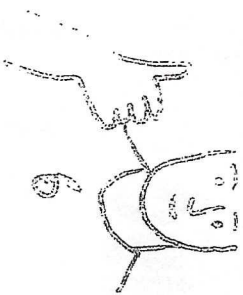

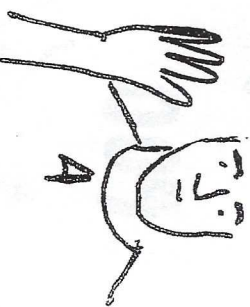

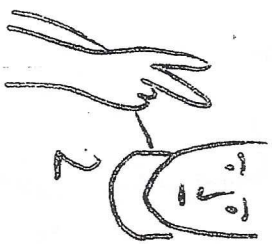

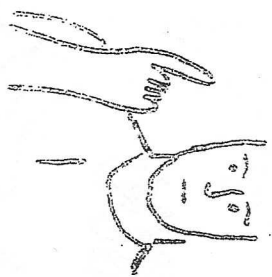

Når du (eller andre) ler, kan det være til
hjelp at du forteller årsaken.

Fra Rådet for tekniske tiltak for
funksjonshemmede, 1989

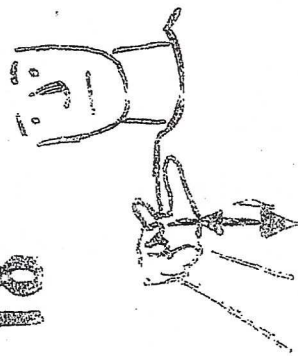

Norsk enhåndsalphabet
 Tegningene viser hendene sett fra mottakers synsvinkel.
 To varianter for bokstavene W, X, Ø og Å er tatt med.
